Presentation Guidelines

While you are free to structure your presentation how you like, many people find the following format useful.

- Title Slide
 - Include the name of the project, title of course, group members, and date.
- Motivation & Summary Slide
 - Define the core message or hypothesis of the project.
 - Describe the questions that were asked, and *why* they were asked.
 - Describe whether the questions were answered to your satisfaction, and briefly summarize the findings.
- Questions & Data
 - Provide more detail on the questions posed, including what kind of data was needed to answer them, and where it was found.
- Data Cleanup & Exploration
 - Describe the exploration and cleanup process.
 - Discuss any insights you had while exploring the data that you didn't anticipate.
 - Discuss any problems that arose after exploring the data, and how they were resolved.
 - Present and discuss interesting figures developed during exploration, ideally with the help of Jupyter Notebook.
- Data Analysis
 - Discuss the steps taken to analyze the data, and answer each question that was asked in your proposal.
 - Present and discuss interesting figures developed during analysis, ideally with the help of Jupyter Notebook.
- Discussion
 - Discuss your findings. Did they meet your expectations, and if not, why? What inferences or general conclusions can be drawn from your analysis?
- Postmortem
 - Discuss any difficulties that arose, and how they were handled.
 - Discuss any additional questions that arose, which couldn't be answered due to time constraints.
 - What would you research next if you had two more weeks?
- Questions
 - Open-floor Q&A with the audience.
